

ARTEMIS Case Study

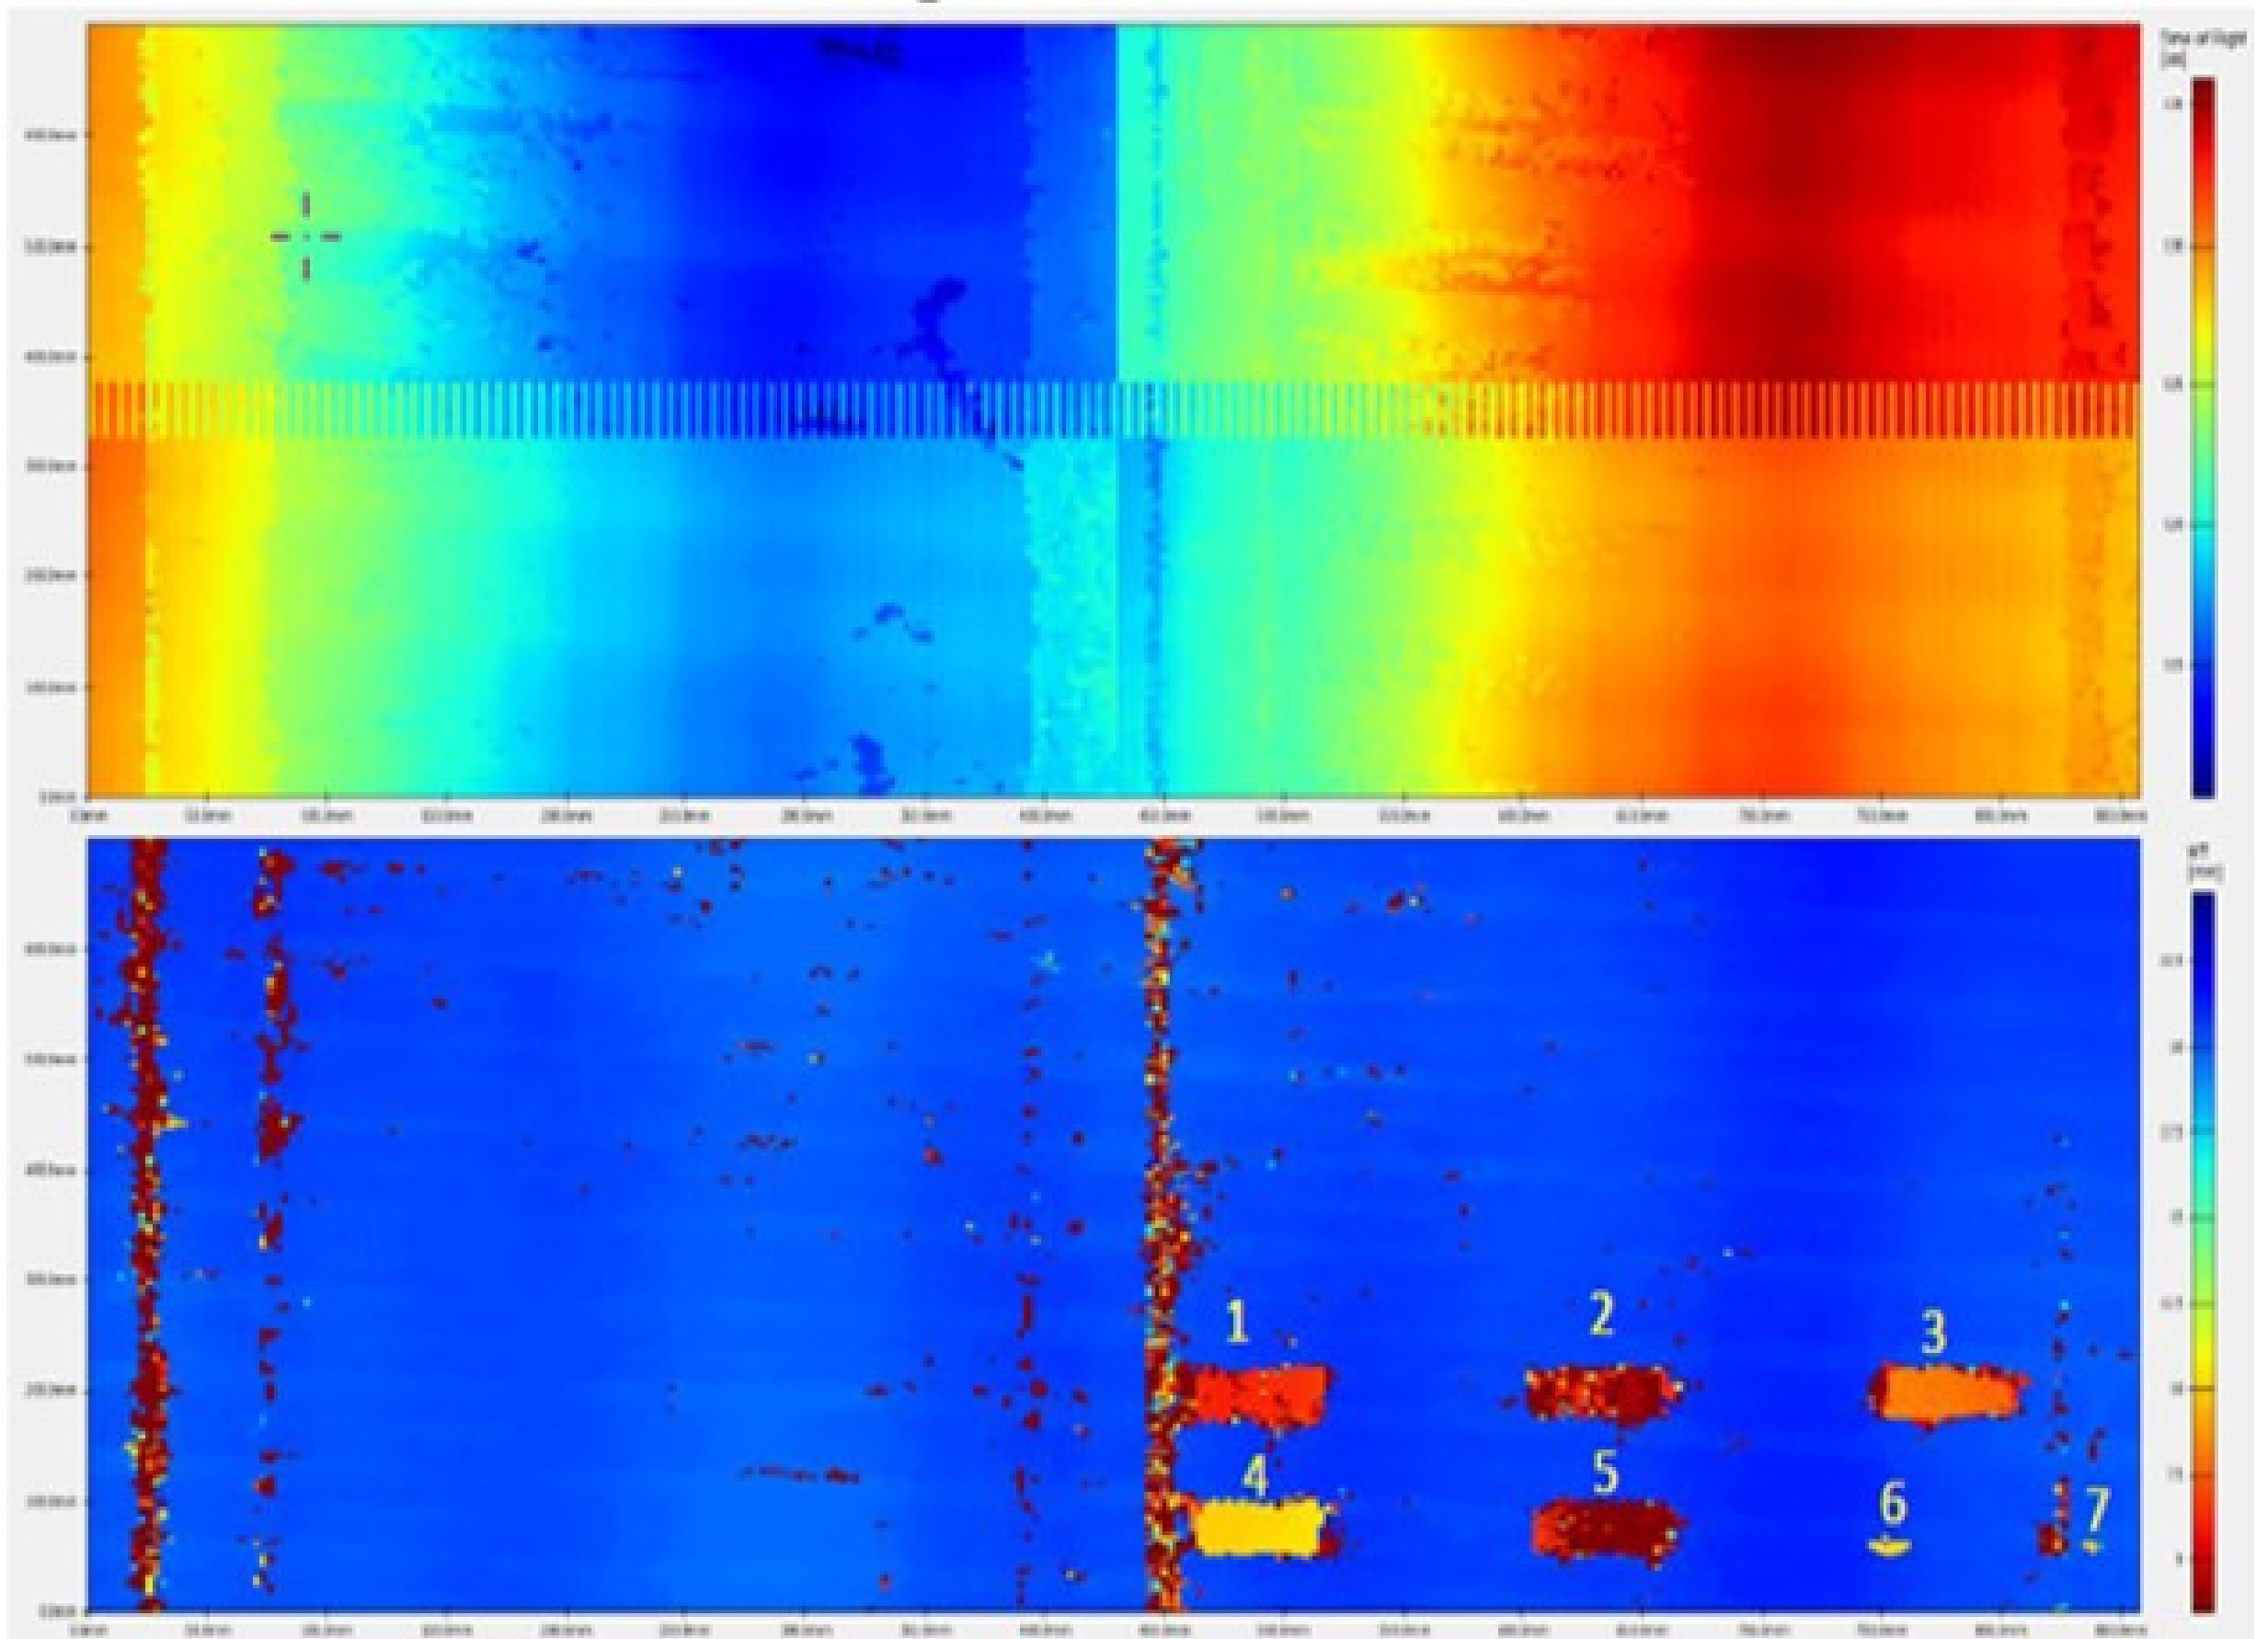

TSC
Part of Eddyfi Technologies

Situation

- 10" WI "Unpiggable" Flowline
- 5 areas selected for inspection of corrosion/erosion rate since previous inspection
- 4 mm Polyethylene and FBE coating
- Partially buried

Onshore Blind Testing

All 7 defects found with high degree of accuracy

Results

- All defects found with high accuracy
- No coating removal required
- Minimal dredging required, saving several days vessel time
- Inspection speed was 30% of allocated operator time
